Break through the barriers to ROI from AI

Turn artificial intelligence into actual business outcomes at speed.

Gatewell USA.

Lenovo | NVIDIA

50%

of organizations have adopted AI. But businesses are still struggling with unclear ROI, insufficient data, and limited expertise.[1]

What's holding organizations back?

- **Incomplete planning**
- **AI skills gap**
- **Data quality and security concerns**
- **Inadequate infrastructure**
- **Scalability struggles**

We'll show you the direct route from opportunity to outcomes with Lenovo Hybrid AI Advantage™ with NVIDIA

It's a flexible framework made up of proven use cases and a full stack of AI solutions. All designed to help us work as your partner, alongside Lenovo's experts, to turn your challenges into demonstrable business value.

Turn intelligence into outcomes with Hybrid AI

See what your people can achieve when we partner with you so you can support them with Hybrid AI-enabled assistants and agents built to boost productivity across a range of business functions and industries.

Reduce content development costs by **70%**[2] and customer service costs by **30%**.[3]

Get set to scale

Build, scale and operate Hybrid AI factories at speed. Reduce tech debt and drive operational efficiencies with NVIDIA AI software, accelerated computing, and networking.

Design, develop and deploy AI POCs in as little as **90 days**.

Innovate with AI you can trust

Stay secure and compliant, even as you adapt to changing business needs. Manage and protect your data with validated solutions from Lenovo and NVIDIA, delivered in partnership with us, so you're ready to innovate with responsible, compliant, trusted AI.

#1

#1 barrier causing AI projects to fall short of expectations is poor data quality, and questions about data sovereignty and compliance.[4]
